

Pressrelease

Stockholm, July 8th, 2020

Bertfelt Benelux was part of the trade fair Aqua Nederland Digitaal for the first-time!

Aqua Nederland has been carried out as a virtual trade fair this year! Bertfelt Benelux was proud to be part of this new initiative and was able to meet you and many others virtually on Thursday afternoon July the 2nd 2020 during [Aqua Nederland Digitaal](#).

Due to the Coronavirus, Aqua Nederland could not be held as usual. A new digital platform was created to enable water technology professionals and knowledge partners from the sector to meet and discuss such important matters as "Circular economy", "the future of potable water" and much more...

With the pressing challenges facing the water sector, this was an excellent time to come together and work together.

Safe from behind computers or telephones, all participants could take part of important discussions and visit our booth as if they were there!

The digitalisation of the water industry is accelerating, and the Aqua Nederland digitaal is part of this transformation. Bertfelt Teknik has recently launched its [LinkedIn](#) account to meet you on the social media and soon on Youtube. Follow us and comment on our posts!
