

Press Release

Great interest for BT-Maric constant flow valves at Aquatech Amsterdam 2019!

Aquatech Amsterdam is the world's leading trade exhibition for process, drinking and waste water. The exhibition is a unique concept in Europe with a 100% focus on water, with a visitor attendance of 22,614 from 147 countries and over 1000 exhibitors every two years.

Aquatech Amsterdam has evolved over the years to feature a wide range of water related products, from pipes and pumps, membranes and metering to water technology solutions. Now 55 years later, the show has built a leading reputation by following the market closely. Over the last editions urban and industrial water were added to the programme as well as resource recovery, desalination, smart metering and much more.

Bertfelt Teknik has been an exhibitor at Aquatech Amsterdam since early 2013 and for every year the show has grown bigger. Agne Bogren, CEO of Bertfelt Teknik summarizes the show:

"Aquatech Amsterdam has proven again to be the centre of gravity in the water industry when it comes to innovation, spotting new trends, transforming the way we think about water. The dynamic and energy level we experience at the Amsterdam show cannot be compared with any other show in the water industry. The show has helped us to meet many new contacts from many European countries. We are especially pleased to have met and initiated dialogues with important OEM-manufacturers. There was a great interest in our range of constant flow valves with small flow rates starting from 0,15 L/min, all with the same high accuracy. We also found a high interest in discussing custom made constant flow valves for OEM-manufacturers. Efficient water handling is a key issue when designing and improving products and processes. BT-Maric constant flow valves are becoming more and more a cornerstone for saving water in many industries."
